

1. PLACE CLAMP PIECES ON FIXTURE LIKE THE SKETCH SHOWS ABOVE.

IS SOMETIMES SHIPPED LIKE THIS.

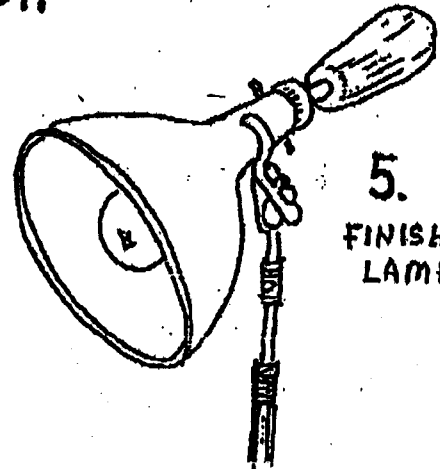

2. PLACE BOLT THROUGH THE SQUARE HOLES.

3. WHILE HOLDING THE PIECES TOGETHER CAREFULLY SLIP THEM OVER THE BALL PART OF THE STAND.

TIGHTEN THE WING-NUT. THIS ALLOWS THE FIXTURE TO BE ADJUSTED TO WHATEVER ANGLE YOU WISH.

5. ALL THAT REMAINS TO BE DONE NOW IS TO SCREW ON THE METAL SHADE. THEN YOU CAN SCREW IN YOUR LIGHT BULB, ADJUST YOUR HEIGHT, PLUG IT INTO AN OUTLET AND ENJOY.

5.
